**Notification to roofing manufacturers, suppliers, and contractors**

Clark County does not accept staples in roofing installations applications per the International Residential Code adopted by the State of Washington. This code has been in effect in Clark County since July 2004. Roofs installed with staples will not be accepted nor approved, making the owner, and their contractor, responsible for any corrections. This may differ from other jurisdictions, including many in Oregon.

Re-roofing permits are required in Clark County. Failure to obtain permits, call for inspections, and receive approvals will result in enforcement action.

Inspections offered through permits help to protect owners and professionals. Contractors have a responsibility to inform customers of the need for inspections and approval.

Clark County will be adding re-roofing to our Limited Trade Permits (LTD) program in the future. Each LTD offers a "book" of 10 permits at a discount and reduces trips to the permit center and no job scheduling. The Limited Trade Permit program offers responsible contractors better service in return for a commitment to code compliance and communication.

We appreciate being a partner in the Clark County construction industry and continue to promote professionalism in our region.
